ABOUT THE COMPANY

Gridspace scans and automates voice calls for contact centers and developers. The company was formed as a collaboration between SRI Speech Labs, the lab behind Siri and Nuance, and a team of Stanford designers and engineers. It is backed by Bloomberg, Wells Fargo, Santander, USAA, the former COO of Facebook, CTO of Yammer, among others. The company's software has been recognized at Nvidia GTC, NIPS and SpeechTek. This year, Gridspace customers will process billions of live call minutes in Gridspace's speech cloud.
